CCTS*

Selection of methodology and Preparation of project documents

Project registration under Voluntary Standards (Domestic & International)

Liaison with project standard/ registry & Verifier/ Validator

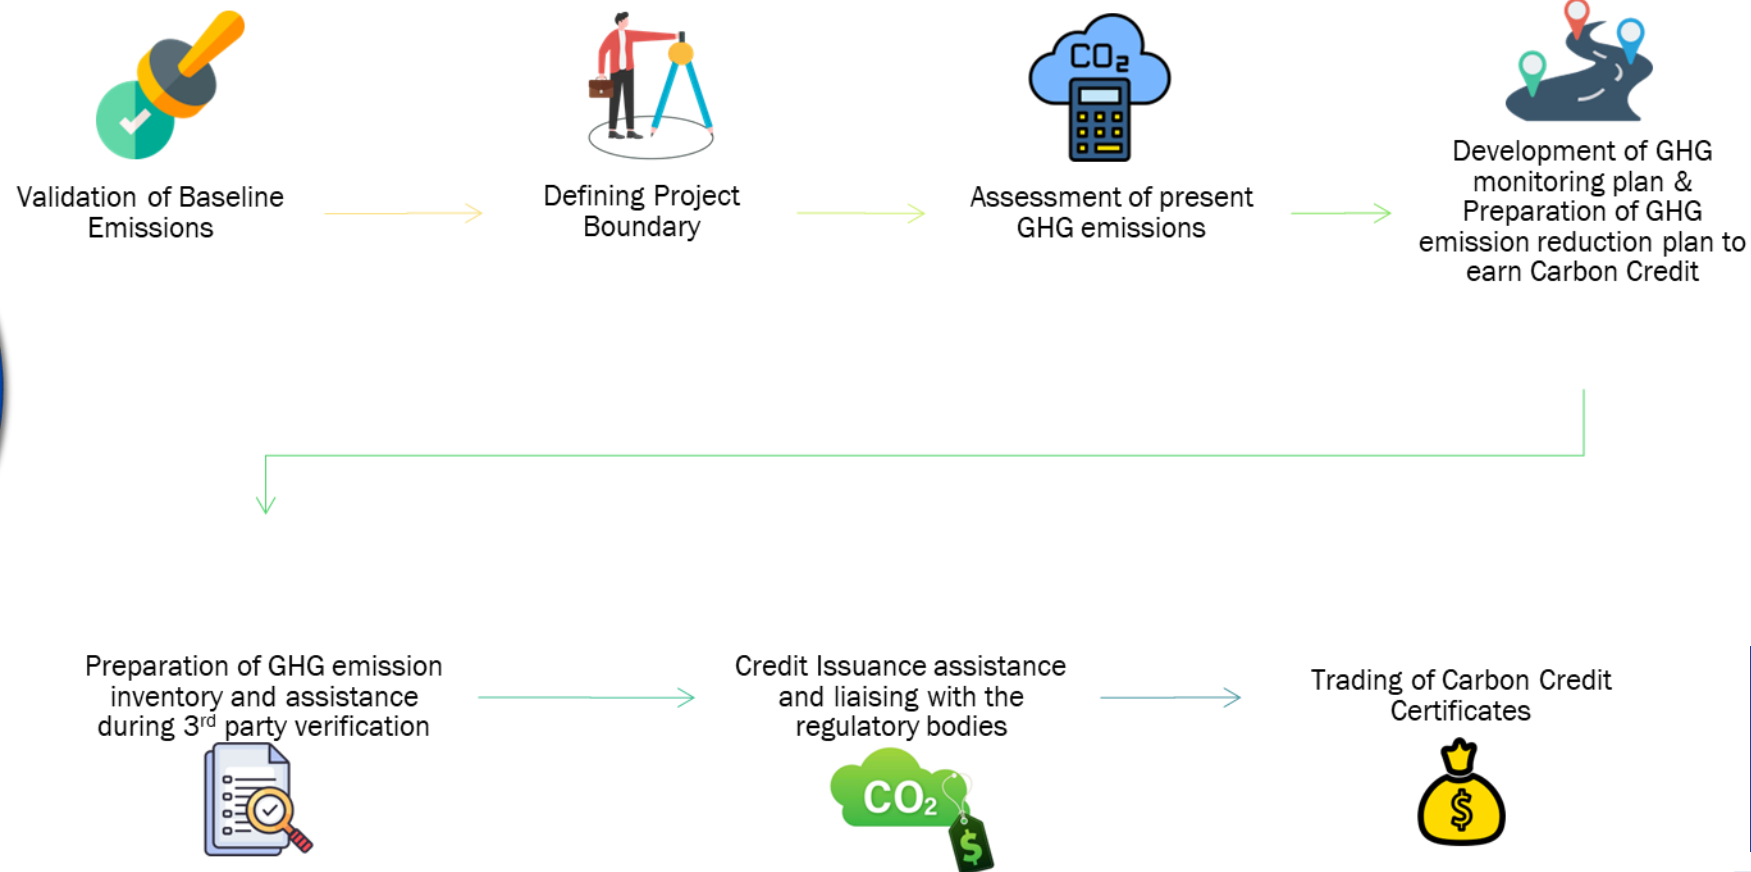

Monetisation of carbon credits

Carbon Asset Development

Compliance Mechanism under CCTS

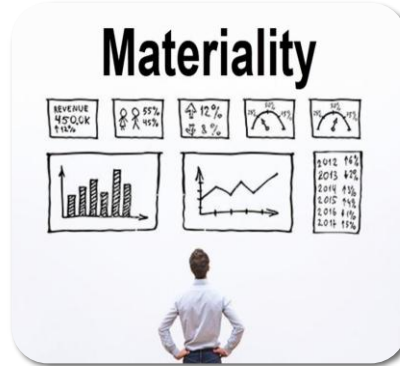

ESG Reporting & Advisory

ESG Gap Assessment / Due Diligence

Conduct structured due diligence to identify material environmental, social, and governance risks, regulatory gaps, and reputational exposures across operations and value chains.

Evaluate alignment with applicable ESG frameworks, disclosure standards, and jurisdictional requirements, providing clear gap analysis and actionable recommendations.

Materiality Assessment

Identify and prioritize ESG topics through structured stakeholder engagement and sector-specific risk analysis to determine issues of highest relevance and impact.

Assess both financial materiality (impact on enterprise value) and impact materiality (organization's impact on environment and society) in line with leading global frameworks.

Reporting & Disclosure

Translate materiality outcomes into actionable priorities, integrating them into business strategy, risk management processes, and sustainability reporting.

Develop ESG and sustainability reports aligned with leading global frameworks and regulatory requirements, ensuring consistency, comparability, and credibility.

Performance Rating

Evaluate current ESG performance against leading rating methodologies to identify gaps, risk exposures, and improvement opportunities.

Develop data-driven action plans to strengthen performance across key rating parameters and improve overall scoring outcomes.

Provide continuous support in responding to rating agencies, ensuring accurate representation of ESG initiatives and progress.
